**Use this machine only as instructed.
Improper use may cause damage or injury.**

The bun warmer design is innovative and unique, with stainless-steel construction for excellent corrosion resistance. The unit features portability, simple operation, large storage capacity, and adjustable temperature control. It effectively maintains the temperature of buns, keeping them fresh and tasty.

1. Specifications

Model	Voltage	Frequently	Power	Dimensions	Net Wt.
MHDBW	110V	60Hz	300W	9.3in × 18.9 in × 23.6 in	49.4 lbs.

2. Operation

- Unit must be properly grounded before use.
- The supply voltage must match the rated voltage of the unit.
- Place buns in the tray before turning on the power.
- Turn on the power. The power indicator light will illuminate.
- Rotate the heating control knob to select the desired holding temperature. Ensure adequate ventilation so that heat can circulate naturally, and the temperature can be maintained.
- To avoid burns when opening the drawer, do not touch the buns.
- After use, always turn off the power and unplug the unit before cleaning to prevent injury.
- If any abnormal condition occurs during operation, stop using the unit immediately. Have the unit inspected and repaired by qualified personnel before resuming use.

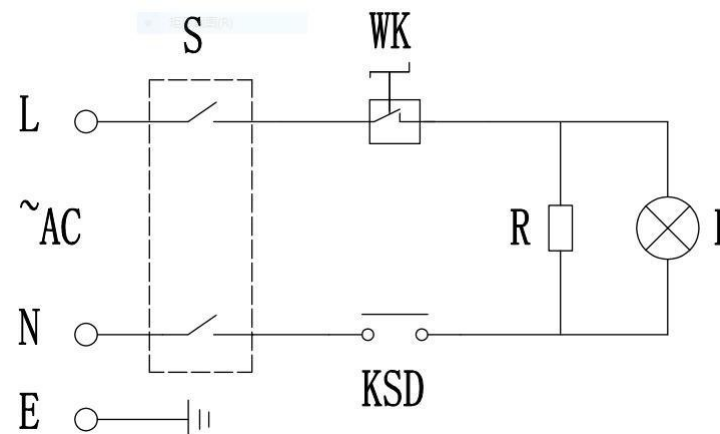

3. Transportation and Storage

During transportation, protect the unit from vibration, impact, inversion, compression, and moisture. Store the unit in a warehouse free of corrosive gases.

4. Cleaning and Maintenance

After use, clean the cabinet interior with a non-corrosive cleaning agent. **Do not use solvents, paint thinner, or other corrosive or abrasive liquids to clean the cabinet surface!**
